The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '301.

EP '301 discloses flame retardant molding compositions comprising polyamides with monomer makeup encompassed by that claimed instantly (abstract). These compositions are further taught as comprising brominated polystyrene, antimony oxide and glass fibers which latter component qualifies as applicants inorganic reinforcing agent. It is seen that the various components are present in relative proportions such as claimed instantly.

Regarding applicants recitation of physical properties, these properties are seen as inherent to the compositions of the reference since the chemical components and proportions are encompassed by those claimed by applicant.
